

# 1869 – the Carbon/Gold Anniversary String

## Material:

### Basses:

HiTech multifilament core with pure silver coated copper wire, which is additionally covered with 24 carat gold

### Trebles:

Our legendary Goldin Carbon treble strings, which sound in-between our perfectly round-sounding nylon strings and ultra-brilliant „normal“ carbon strings. (We recommend securing the very thin and smooth trebles with at least 1 locking knot before attaching these on the tie-bridge! Failure to do so may cause damage to the varnish and the top!)

## Features:

- High tuning stability already after a very short time
- Absolutely balanced sound thanks to perfect matching of the materials
- Powerful but warm bass with clear sound and round brilliance

Of course available as a complete single string program, as treble and bass sets in 2 tensions. The trebles are identical in both sets:

## 1869 Goldin Carbon Trebles Medium-High Tension

String	Quality	Model	Diameter	Tension
E-1	Goldin Carbon	7251MHT	.0,62mm/.024"	8,0kg/17.64lbs
